## Summary

---

Driven **Frontend Developer** specializing in **React.js**, **TypeScript**, and **accessibility**, with a diverse background in Continuous Improvement, Behavior Science, and Technical Training. Currently seeking an entry-level role building accessible, high value frontend solutions.

## Skills

---

- |              |                     |                 |
|--------------|---------------------|-----------------|
| ■ React.js   | ■ Web Accessibility | ■ Git & GitHub  |
| ■ TypeScript | ■ HTML & CSS        | ■ Unit Testing  |
| ■ Next.js    | ■ Tailwind CSS      | ■ Firebase      |
| ■ JavaScript | ■ Material UI       | ■ Agile & Scrum |

## Experience

---

### Frontend Engineer (remote)

GRIDIRON SURVIVOR – Software Engineering Apprenticeship

October 2024 – Present

- Built and maintained a fantasy football SaaS product using **Next.js**, **TypeScript**, **React.js**, and **Tailwind CSS**, including unit testing with **Jest/React Testing Library** and debugging.
- Removed distracting, obsolete information from the site, gave users the ability to clear popup notifications, and resolved a screen flickering issue by creating a new login authentication workflow in **React** and utilizing a loading spinner.
- Discovered and reported a key **accessibility** issue – website menu controls had no text description or aria label meaning screen reader users would be unable to navigate the site.
- Conducted peer code reviews, actively participated in sprint planning, assigned sprint points to tickets to accurately estimate work, and communicated progress through daily scrum.

### Implementation Specialist (remote)

SUBMITTABLE – Startup SaaS Company

February 2022 – June 2024

- Built and deployed the complex, multi-lingual intake form for the State of Minnesota's Tax Rebate Program using Submittable software in under 2 weeks, emphasizing **accessibility** and resulting in the successful distribution of \$1B to Minnesota citizens.

- Successfully onboarded 100+ new Submittable customers utilizing a robust customer intake process, empathetic listening, **project management**, and detailed **technical training**.
- Designed a multi-stage custom software **automation workflow** for customer IFF that reduced their staff's manual work hours by 50% .
- Actively contributed to the company's **Accessibility Team** by bringing forward customer concerns, troubleshooting, and creating best practices around accessibility.

### Small Business Owner

HIGH SPIRITS DOG TRAINING (July 2014 – August 2019)

DANIELLE LINDBLOM COACHING (October 2018 – February 2022)

- Provided private canine **behavior consulting** services, public group classes, and in-person workshops, serving 100+ clients per year.
- Delivered transformative experiences in personal growth for life coaching customers via 1 on 1 virtual sessions and workshops.
- Built and maintained professional business **websites** over 8 years using Wix.com – including SEO, copywriting, and responsive design – resulting in dozens of qualified leads per month.

### Lean Manufacturing Leader

PENTAIR – Global Manufacturing Company

April 2015 – March 2017

- Executed a 12-month Lean Transformation project for a 2-shift, 100 employee assembly area by leading cross-functional teams through several week-long kaizen **process improvement** events resulting in \$650k annual cost savings and 25% faster time to manufacture.
- **Manager** for a team of Lean Manufacturing Technicians, including interviewing and hiring. Provided work assignments, coaching and development, and career opportunities.

## Projects

---

SERVICE DOGS AROUND TOWN – Solo Project

August 2024 – Present

- Web application built with **React.js**, **JavaScript**, and **Tailwind CSS** that allows service dog handlers (persons with disabilities) to rate and review local businesses based on the comfort and safety of their service animals, including “red flags” for access issues.
- Created the ability to look up businesses and see existing entries on a map UI using the **Google Maps API**. Utilized **Firebase** integration for user authentication and data storage.
- Version 3 of this site is currently in development with a new tech stack (**Next.js**, **TypeScript**, **Material UI**) and incorporating suggested changes from user testing feedback.

## Education

---

**Bachelor of Science Mechanical Engineering**

UNIVERSITY OF MINNESOTA
